

Name - Comic Guide

Tagline - Your guide for exploring the cosmos.

Description - An app that makes stargazing fun and interesting using our sky map.

Users - Teens and young adults in the suburbs.

Goal statement - Our Cosmic Guide app will let users stargaze in an informative way which will affect users who want to get information about a planet, star, or constellation by using our sky map.

How it works - Using your compass and location, we can determine which part of our sky map should match your real-life view.

Similar apps - Sky Guide, Night Sky.

Functions - See a map of the night sky; get information on stars, planets, and constellations; mark the things you have already seen.

Step-by-step tasks -

1. Open sky map
2. Choose planet, star, or constellation
3. Get information on selected
4. Save to list or mark as visited
5. View visited or previously visited
6. Modify list or visited
7. Back to list / visited or sky map
